individual in resume

Personal Information

Chinese name	YinPengfei	Date of birth	April 02, 2000
Sex	Male	Residence	Nanchang city Qingshan District
Mobile Phone	13237042877	Q Q	2232726197
Degree	undergraduate	Project experience	2 years

Job intension

The nature of the work	full-time
Hope industry	computer software
Target position	Java Software Engineer
working place	HongKong

Educational background

2018/09 – 2022/06	Jiangxi University of Finance and Economics	Software engineering

Personal skills

Familiar with the Java programming language

Familiar with Struts, Hibernate, Spring framework technology

Familiar with JSP, JavaSctipt, Html, Css, XML, Ajax, JDBC, Servlet, JavaBeans, technology Familiar with T-SQL,

PL/SQL database programming language

Familiar with JavaScript framework JQery

Familiar with Eclipse, MyEclipse, Dreamweaver, Balsamiq, Mockups, PowerDesigner, Visio software Familiar with

the Tomcat application server

Understand the Java web development technology

Understand the Apache Web server

Understanding of MySql database

Understand TCP/IP, Http network protocol

Project experience

Project period	**2018 /10 -- 2019 /02**	Nanchang Xinchen Education Student Management system			
Development tools	MyEclips8.5 / Tomcat6.0 / Mysql 5.7				
Project roles	Group member				
Project construction	B/S				
Project technology	Ext+Ajax+Html	Js+Div+Css	Jstl+El	Struts+Spring+Hibernate	Xml JavaBeans

Project Description	●project purpose
	Manage and maintain the operation and data of all courses teaching module of the system, to help teachers teachers to reduce the workload, and provide the necessary data reference give the new teacher
	●description of authority
	System administrators, teachers
	● project functional description
	Log on to the system, the front page the latest upload, recently viewed, attention module, standard questions, all the questions the current user input, input new topic, standard question bank, the storage box, the history of export record, dustbin, module queries, query, question all derived, some derived, Material upload and preview personal information, view the details, title, amend the title .
	The administrator unique operation: all operations on the teachers' crud, the records in the system in addition to query, data processing .
Responsible for function	● opreliminary analysis
	Demand investigation, demand analysis, using Mysql database design, the use of Rose 2007 drawing E-R diagram and database model diagram.
	● later coding work
	Implementation of registration and login Function and Implementation of publishing topics Function,The DAO layer database connection frequent switch using reflection technology in implement .
	●

Project period	**2012 /12 -- 2013 /1**	Dream e-mail system
Software environment	Windows 7	
Development tools		
Project roles		
Project construction		
Project technology		
	MyEclips8.5 / Tomcat6.0 / Sql Server	
	Group leader	
	B/S	
	Jsp Jquery Js div+css Jstl El Struts Xml JavaBeans	
Project Description	●project development objective	
	The preparation of a through the browser can achieve the basic communication system	
	●project for the crowd	
	Age 18-24 years old	
	●project functional description	
	Registration, login, all unread mail, outbox, read mail, delete: delete a message (the inbox, outbox), batch delete messages, the inbox, delete all the messages, contact: recent contacts, all contacts, forwarding , update mail .	
Responsible for function	●overall project is responsible for the work	
	The overall function of the project division, the entire front page design, the background part code	
	●preliminary analysis and the front page of work	
	Item analysis, webpage design, process control, in which jQuery is used to realize the display effect of the initial login page (advertising image transform) click on the login and	

registration, use the JS to obtain form validation show and hide, also includes Filter and CSS style, advertising page was implemented by using JQuery, use the iframe nested each page.

- background code work

    The inbox, outbox, trash, read e-mails, letters, e-mail, mail forwarding, each function using JDBC technology and Struts framework to achieve full.

Project period **2012 /11 -- 2012 /11**	**Simulation of Struts framework**
Software environment	Windows 7
Development tools	MyEclips8.5 / Tomcat6.0 / Oracle10g
Project roles	Group leader
Project construction	B/S
Project technology	Jsp+Xml+Jstl+El + +ResultMateData class MVC pattern
Project Description	- project requirements

By using MVC mode and reflective technology will be the layout of the page and background data traditional calls for further packaging, to simplify repetitive code

- project functional description

    Simplify the use of Request objects, dynamic method invocation, string directly to the client output, request and Session objects, simplify data processing, packaging persistence layer.

Responsible for function   - overall responsibility for wor

    project division, part of the code written

- Code written work

    Package Request and Session objects, Request objects are encapsulated in a class, gets the object directly through the unique address identifies the memory usage, obtained directly from the class in the get object,.Action object interface does not directly to call in Servlet does not need to have the Request object.

Myself evaluation

I earnestly is responsible to the work, has the strong team cooperation spirit and a strong learning ability, in the software development and design work has a strong interest and innovative spirit, and have good communication skills and mental occupation accomplishment, have a strong sense of time, do things more carefully. Can work under pressure, able to obey their superiors.
